

Rating of Severity/Function: Using assessment protocols that address all six dimensions, assign a severity rating of 0 to 4 for each dimension that best reflects the client's functioning and severity. Place a check mark in the appropriate box for each dimension.

Risk Ratings	Intensity of Service Need	Dimensions					
		1.	2.	3.	4.	5.	6.
(0) No Risk or Stable – Current risk absent. Any acute or chronic problem mostly stabilized.	No immediate services needed.						
(1) Mild - Minimal, current difficulty or impairment. Minimal or mild signs and symptoms. Any acute or chronic problems soon able to be stabilized and functioning restored with minimal difficulty.	Low intensity of services needed for this Dimension. Treatment strategies usually able to be delivered in outpatient settings						
(2) Moderate - Moderate difficulty or impairment. Moderate signs and symptoms. Some difficulty coping or understanding, but able to function with clinical and other support services and assistance.	Moderate intensity of services, skills training, or supports needed for this level of risk. Treatment strategies may require intensive levels of outpatient care.						
(3) Significant – Serious difficulties or impairment. Substantial difficulty coping or understanding and being able to function even with clinical support.	Moderately high intensity of services, skills training, or supports needed. May be in, or near imminent danger.						
(4) Severe - Severe difficulty or impairment. Serious, gross or persistent signs and symptoms. Very poor ability to tolerate and cope with problems. Is in imminent danger.	High intensity of services, skills training, or supports needed. More immediate, urgent services may require inpatient or residential settings; or closely monitored case management services at a frequency greater than daily.						

Placement Decisions: Indicate for each dimension, the least intensive level consistent with sound clinical judgment, based on the client's functioning/severity and service needs

Level of Care/Service Indicated - Insert the ASAM Level number that offers the most appropriate level of care/service that can provide the service intensity needed to address the client's current functioning/severity; and/or the service needed e.g., shelter, housing, vocational training, transportation, language interpreter	
Level of Care/Service Received - ASAM Level number -- If the most appropriate level or service is not utilized, insert the most appropriate placement or service available and circle the Reason for Difference between Indicated and Received Level or Service	
Reason for Difference - Circle only one number -- 1. Service not available; 2. Provider judgment; 3. Client preference; 4. Client is on waiting list for appropriate level; 5. Service available, but no payment source; 6. Geographic accessibility; 7. Family responsibility; 8. Language; 9. Not applicable; 10. Not listed (Specify):	
Anticipated Outcome If Service Cannot Be Provided -- Circle only one number - 1. Admitted to acute care setting; 2. Discharged to street; 3. Continued stay in acute care facility; 4. Incarcerated; 5. Client will dropout until next crisis; 6. Not listed (Specify):
